

DC Met Tower Lighting

Meteorological Tower Red Lighting

LED

Flash Technology's DC powered Met tower package includes everything needed for an FAA approved solar powered obstruction lighting system. All lighting products are FAA compliant to AC 70/7460-1K and ETL certified to FAA AC 150/5345-43F.

FAA A-0 System (Less than 150ft / 45.7m)

(2) FAA type L-810 LED DC Markers

(1) FTC 2301 DC Red Light Controller

(Cabling, installation hardware, accessories, installation drawings, etc)

FAA A-1 System (150– 350ft / 45.7-106.7m)

(1) FAA type L-864 LED DC Beacon

(2) FAA type L-810 LED DC Markers

(1) FTC 2301 DC Red Light Controller

Options: Solar Power Supply, Wireless Monitoring

L864 Red LED Beacon

- ◆ 24-48 VDC
- ◆ Conduit not required for most installations
- ◆ Mounts onto existing bolt pattern
- ◆ Uses 97% less energy than incandescent fixtures
- ◆ Only uses 12 watts in flash mode (24W steady)
- ◆ Meets or exceeds industry EMI/RFI standards
- ◆ 5 Year Warranty

L810 LED Side Markers (2 required)

- ◆ 12-48 VDC
- ◆ Weather / Corrosion resistant fixture
- ◆ Low power consumption—3.5 watts

FTC 2301 Red Light Controller

- ◆ 12-48 VDC
- ◆ 3 Alarm outputs for notification
- ◆ Photocell mode control operation with status indication
- ◆ Low power consumption—4 watts

Coming Soon

FTW 174 FTW Wireless Monitoring

- ◆ Cellular communication
- ◆ 4 dry contacts for alarm notification
- ◆ Communicates w/ Flash Technology's 24/7 National Operation Center

Solar Power Option

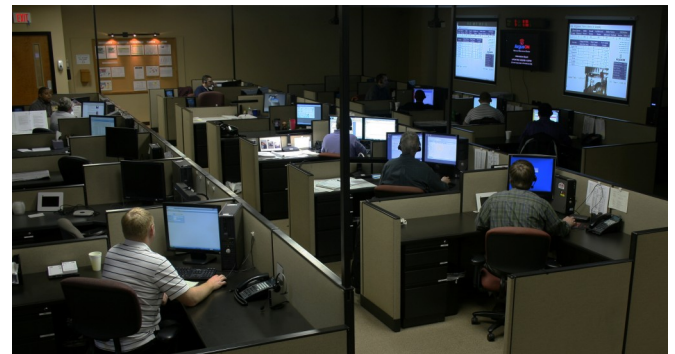

Custom sized solar power supplies to provide power when grid power is unavailable. Systems are sized based on load and geographical location which dictates solar irradiation. The system will power the lights with up to 7 days autonomy per FAA Engineering Brief No. 76.

National Operations Center

The ArgusON National Operations Center offers dynamic solutions to meet your business needs. From basic call center services to complex alert monitoring hardware and alert services, the ArgusON NOC is your one stop shop for any business needs.

- 24/7/365 Operations
- Call Recording
- Technical support staff
- Automatic Call Distribution
- Instant Notification
- Online Status - Asset Tracking and Ticket status
- Personalized recording and call tree system available*
- Trouble escalation available with manual call follow up*

*Additional fees may apply
