

# Antenna Universal Mounting Bracket Installation Instructions

The Flash Technology **Antenna Universal Mounting Bracket Kit** (PN 1905355) accommodates either the magnetic mount or body mount style antenna and provides multiple mounting options (wall, Uni-strut, or pole) permitting antenna installation in the optimum location for best signal strength and reliable communication.

The bracket also permits mounting of a photodiode/photocell or GPS antenna in the two side holes of the top plate. See the Product Manual for detailed antenna installation instructions.

**Important:** The antenna bracket must be grounded with a minimum AWG 14 Ground wire to the site Grounding System. Observe proper Grounding procedures.

## Mounting Options (magnetic mount antenna shown)

<p style="text-align: center;"><u>Wall Mount</u></p> <p>Use screws to mount to the inside or outside wall of a shelter. <b><i>(Screws are not included in the kit.)</i></b></p> 	<p style="text-align: center;"><u>Horizontal Uni-strut Mount</u></p> <p>Use spring-nuts to mount to Uni-strut. <b><i>(Spring-nuts are not included in the kit.)</i></b></p> 	<p style="text-align: center;"><u>Vertical Pole or H-frame post Mount</u></p> <p>Use 3" U-bolt (<b><i>included</i></b>) to mount to pole or H-frame post. The bracket permits use of larger U-bolts, up to 5".</p>
