

FTS 430

Current-Driven Omnidirectional Approach Lighting

The FT 430 is a current-driven omnidirectional approach light that identifies runway end or the acquisition of an active runway. It can be used as a simple runway end identifier light (*REIL*) or complete omnidirectional approach lighting system for runway alignment and runway threshold marking.

The flash head and power converter may be mounted together to form a single unit or separately to adapt to specific terrain needs.

STANDARD FEATURES

- Compatible with air-to-ground radio controllers and ground-to-ground remote systems
- Modular design for easy maintenance
- Longer flashtube life due to low voltage (± 500 VDC) required for operation
- Can be set for single-step or three-step intensity
- Conforms to FAA AC 150/5345-51, FAA Type L-849 Style B and F
- Complies with ICAO lighting regulations
