

FTB 208 White Catenary Lighting System

The FTB 208 is an FAA type L-857 that provides a white strobe for day and night. It is designed for structures more than 500' AGL that support overhead cables and wires suspended over canyons, valleys or waterways. The system is comprised of three lighting levels. The flash sequence is middle-top-bottom, with the interval between the top and bottom flashes equal to twice the interval between the middle and top flashes.

The FTC 121 system controller adds hardware which allows for EagleSmart monitoring and diagnostics.

Manufactured to specifications for FAA Type L-856, FAA-AC 150/5345-43F.

Standard Features

- Single enclosure for power converter and flashhead for weight and wind load considerations
- Available in multiple input voltages
- Complete system includes EagleSmart controller, handheld programmer and software
- NEMA 4X stainless steel outdoor rated enclosure
- Optional GPS synchronization
- Component-level technical support M-F 7am-7pm Central time
- Remote diagnostics with POTs connection to FTC 121
- 2-year warranty on all parts including tubes
- Listed on the Buy American Act registry
