

FTW 170 GPS Wireless Synchronization Unit

The FTW 170/170-2 wireless synchronization unit supplies a timing pulse to synchronize flashing obstruction lights on any number of controllers/power converters manufactured by Flash Technology. The structures needing synchronization can be any distance apart.

Standard Features

- Wirelessly synchronize multiple flashing structures
- Quick & easy install
- Battery back-up ensures operation during power outages
- Up to 500' separation from controller (FTW 170-2)
- Lockable weatherproof enclosure
- 1-year warranty
- Designed for Flash Technology systems only

Location

The location of the FTW 170/170-2 must be selected to provide for good reception by its antenna. The antenna must be mounted horizontally with an unobstructed view of the full sky. The GPS information travels by “line of sight” and cannot penetrate through most barriers.

Applications

- Buildings
- Bridges
- Towers
- Wind farms
- Oil platforms

GENERAL SPECIFICATIONS

Dimensions	8.25 H x 6.5 x W x 4.5" D (209.6 x 165 x 101.6 mm)
Weight	6.5 lbs. (2.9 kg)
AC Voltage	24 VAC
Power	5 VA
Battery Back-up	24+ hours
