

ADLS Lighting Control Module

Flash Technology's new FTC 370 Lighting Control Module (LCM) provides Ethernet connectivity of the FTS 370i obstruction light(s) to an Aircraft Detection Lighting System (ADLS) utilizing standard Modbus TCP protocol. The FTC 370 is currently compatible with the Detect Harrier and the Terma Scanter ADLS systems.

Features

- Controls up to 2 new or existing FTS 370i obstruction lights
- Modbus TCP communication protocol
- Failsafe feature if communication error occurs with ADLS
- 5-year warranty

Part Number

F1371500

SPECIFICATIONS

Input Voltage	120-240 VAC
Frequency	50-60 Hz
Dimensions	10 x 8 x 6" (254 x 203.2 x 155.4 mm)
Protection Rating	IP66, NEMA 4x
